Description

Up to 4 hours of protection against harmful germs

My-shield[®] Hand Sanitizer Foam is formulated with Zetrisil[®], a unique nano antimicrobial technology that not only kills on contact but also has a persistent activity that helps prevent infections. The persistence of My-shield[®] Hand Sanitizer Foam has been shown to remain effective for up to 4 hours.

Kills 99.99% of harmful germs

My-shield[®] Hand Sanitizer Foam kills 99.99% of the harmful germs and bacteria it comes in contact with by disrupting the outer cell membranes resulting in a physical kill. This physical kill ensures microorganisms don't adapt or become resistant over time.

Alcohol-free formula

Most hand sanitizers contain high percentages of alcohol to poison germs, generally over 65%. This creates a highly flammable, poisonous mix that carries with it an opportunity for being ingested amongst other factors. Constant use of alcohol-based hand sanitizers also has the effect of drying out your skin, leading to irritation and cracking. My-shield[®] Hand Sanitizer Foam is water-based and contains no alcohol. It's also non-flammable and non-poisonous, making it more effective & safer hand sanitizer for the whole family.

Moisturizes your hands with Aloe vera

My-shield[®] Hand Sanitizer Foam is a water-based sanitizer with added aloe vera to leave your hands feeling fresh and soft.
